

# **Syllabus**

## **Semester I**

## Mathematics-I

1.1 Course Number: MA101

1.2 Contact Hours:3-1-0 Credits:11

1.3 Semester-offered: 1<sup>st</sup> Year –Odd

1.4 Prerequisite: Class 10<sup>th</sup> level Mathematics

1.5 Syllabus Committee Members: Dept. of Mathematical Sciences, RGIPT

### 2. Objective:

This course is designed to give a comprehensive coverage at an introductory level to the subject of Trigonometry, Co-ordinate Geometry, Complex Numbers, Differential Calculus and Vector Algebra.

### 3. Course Content:

Unit-wise distribution of content and number of lectures

Unit	Topics	Sub-Topic	Lectures
1	<b>Trigonometry</b>	Concept of angle; Measurement of angle in degree, grades and radians and their conversions; Trigonometric ratios; Sum, difference formulae and their applications (Without proof); Product formula (Transformation of Product to Sum and Differences and vice versa); Trigonometric Ratios of multiple angles, sub-multiple angles ( $2A, 3A, A/2$ ); Graph of $\sin x$ , $\cos x$ , $\tan x$ , $\operatorname{cosec} x$ , $\sec x$ and $\cot x$ ., Basic concept of inverse trigonometric functions.	8
2	<b>Co-ordinate Geometry</b>	Equation of straight line in various standard form (Without Proof); Intersection of two straight lines Angle between two straight lines; Parallel lines and perpendicular lines; Perpendicular distance formula Sections of a cone: Circle, Parabola, Ellipse and Hyperbola; General equation of a circle and its characteristics; Definition of conics (Parabola, Ellipse, Hyperbola) their standard equations (without proof).	8
3	<b>Complex Numbers</b>	Definition of Complex numbers; Real and imaginary parts of a Complex number; Conjugate of a complex number; Modulus and amplitude of a complex number; Addition, Subtraction, Multiplication and Division of complex numbers, Polar and Cartesian form of a complex number and its conversion from one form to other, De-Moivre's theorem and its application.	7

4	<b>Differential Calculus</b>	Definition of function; Concept of limits; Four standard limits $\lim_{x \rightarrow a} \frac{x^n - a^n}{x - a}$ , $\lim_{x \rightarrow 0} \frac{\sin x}{x}$ , $\lim_{x \rightarrow 0} \frac{a^x - 1}{x}$ and $\lim_{x \rightarrow 0} (1 + x)^{1/x}$ , Differentiation of $x^n, \sin x, \cos x, e^x$ and $\log_a x$ by the first principle rule of derivative, Differentiation of sum, product and quotient of functions; Differentiation of function of a function; Differentiation of trigonometric and inverse trigonometric functions; Logarithmic differentiation; Exponential functions. Definition & meaning of partial derivative. Evaluation of partial derivatives. Definition & examples of homogeneous functions. Euler's theorem (1st order) on Homogeneous functions for 2 variables (without proof). Problems.	12
5	<b>Vector Algebra</b>	Definition, notation and rectangular resolution of a vector; Addition and subtraction of vectors; Scalar and vector products of 2 vectors; Simple problems related to work; moment and angular velocity.	6
	<b>Total</b>		<b>41</b>

#### 4. Reading

##### 4.1 Textbooks:

1. B.S. Grewal, Higher Engineering Mathematics, Khana Publishers, New Delhi, 40<sup>th</sup> Edition, 2007.
2. Mathematics Textbook for Class XI and XII (NCERT).
3. S. L. Loney, The Elements of Coordinate Geometry Part-1 Cartesian Coordinate.

##### 4.2 Reference Books:

1. R. D. Sharma, Mathematics for Class 11 and 12.
2. E. Kreyszig, Advanced Engineering Mathematics, Khanna Publisher.
3. Murray R. Spiegel, Robert E. Moyer, College Algebra, Tata McGraw Hill, New Delhi, 2nd Edition, 2000.
4. Frank Ayers, Elliot Mendelson, Calculus, McGraw Hill, New York, 4th Edition.

#### 5. Outcome of the Course:

After the completion of the course the students will be able to

- 1) Solve problems involving angles, triangles, and periodic phenomena using trigonometric functions. Apply trigonometry in real-world situations, such as navigation, physics, and engineering

- 2) Understand the cartesian coordinate system and the relationship between points, lines, and curves. Represent geometric figures using equations and inequalities.
- 3) Understand the concept of a derivative as the rate of change and slope of a function.
- 4) Apply complex numbers in solving equations and expressing solutions.
- 5) Understand the geometric and algebraic properties of vectors.

## Physics-I

1.1 Course Number: PY101

1.2 Contact Hours: 3-1-0 Credits: 11

1.3 Semester-offered: 1<sup>st</sup> Year - Odd

1.4 Prerequisite: Class 10<sup>th</sup> level Physics and Mathematics

1.5 Syllabus Committee Members: Dr. Shikha Dwivedi & Dr. Nimisha Raghuvanshi

### 2. Objective:

- i) Physics is the mother of all engineering disciplines hence students must have a fundamental understanding of the topic in order to grasp their core engineering subjects more readily. As a result, while reviewing the curriculum, emphasis was placed on the concepts, laws, working equations, and basic notions of physics to assist students in studying the key courses.
- ii) This will give a solid foundation for future self-development in order to cope with new advances. The study of physics encompasses a wide range of fascinating subjects, many of which have something to do with the materials and objects that surround us. It tries to provide a knowledge of this environment via both observation and behavior prediction of such items.
- iii) The course material places a strong emphasis on the practical application of physical concepts and analysis in a variety of engineering and technological sectors.
- iv) The course will assist diploma engineers in using fundamental ideas and principles to tackle complex engineering issues and comprehend various technology-based applications.

### 3. Course Content:

Unit-wise distribution of content and number of lectures

Unit	Topics	Sub-Topic	Lectures
1	<b>Units and Measurements</b>	Physical quantities: Fundamental and derived, Units and systems of units (FPS, CGS and SI units), Dimensions and dimensional formulae of physical quantities, Principle of homogeneity of dimensions, Dimensional equations and their applications (conversion from one system of units to other, checking of dimensional equations and derivation of simple equations), Limitations of dimensional analysis.  Measurements: Need, Measuring instruments, Least count, Types of measurement (direct and indirect), Errors in measurements (systematic and random), Absolute error, Relative error, Error propagation, Error estimation and significant figures.	8

2	<b>Scalars and Vectors</b>	<p>Scalar and Vector quantities: Examples, Representation of vectors, Types of vectors, Addition and Subtraction of Vectors, Triangle and Parallelogram law (Statement only), Scalar and Vector product, Resolution of a vector and its application to inclined plane.</p> <p>Kinematics equations in scalar and vector form with related numerical problems.</p>	7
3	<b>Force and Motion</b>	<p>Force, Momentum, Statement and derivation of conservation of linear momentum, its applications such as recoil of gun, Rockets, Impulse and its applications.</p> <p>Circular motion, Angular displacement, Angular velocity, Angular acceleration, Frequency, Time period, Relation between linear and angular velocity, Linear acceleration and angular acceleration (related numerical), Centripetal and centrifugal forces with live examples, Moment of inertia and its physical significance, Definition of torque and angular momentum and their examples.</p>	8
4	<b>Work, Power and Energy</b>	<p>Work: Concept and unit, Examples of zero work, Positive work and negative work.</p> <p>Friction: Concept, Types of friction, Laws of limiting friction, Coefficient of friction, Reducing friction and its engineering applications, Work done in moving an object on horizontal and inclined plane (for rough and smooth surfaces) and related applications.</p> <p>Energy and its unit, Kinetic energy, Gravitational potential energy with examples and derivations, Mechanical energy, Conservation of mechanical energy for freely falling bodies, Transformation of energy (examples).</p> <p>Power and its unit, Power and work relationship, Calculation of power (numerical problems).</p>	7
5	<b>Properties of Matter</b>	<p>Elasticity: Definition of stress and strain, Moduli of elasticity, Hooke's law, Significance of stress-strain curve.</p> <p>Pressure: Definition, Unit, Atmospheric pressure, Gauge pressure, Absolute pressure, Fortin's</p> <p>Barometer and its applications.</p> <p>Surface tension: Concept, Unit, Cohesive and adhesive forces, Angle of contact, Ascent Formula (No derivation), Applications of surface tension, Effect of temperature and impurity on surface tension.</p>	12

		<p>Viscosity and coefficient of viscosity, Terminal velocity, Stokes' law and effect of temperature on viscosity, Application in hydraulic systems.</p> <p>Hydrodynamics: Fluid motion, Stream line and turbulent flow, Reynold's number, Equation of continuity, Bernoulli's Theorem (only formula and numerical) and its applications.</p>	
<b>Total</b>			<b>42</b>

## 4. Readings

### 4.1 Textbooks:

1. Textbook of Physics for Class XI (Part-1, Part-2); N.C.E.R.T., Delhi.

### 4.2 Reference Books:

1. Applied Physics, Vol. I and Vol. II, TTTI Publications, Tata McGraw Hill, Delhi.
2. Concepts in Physics by H. C. Verma, Vol. I&II, Bharti Bhawan Ltd., New Delhi.
3. Engineering Physics by P. V. Naik, Pearson Education Pvt. Ltd, New Delhi.
4. Engineering Physics by D. K. Bhattacharya & Poonam Tandan; Oxford University Press, New Delhi.
5. Comprehensive Practical Physics, Vol, I & II, J. N. Jaiswal, Laxmi Publications (P) Ltd., New Delhi.
6. Practical Physics by C. L. Arora, S. Chand Publication.

## 5. Outcomes of the Course:

After undergoing this subject, the student will be able to:

- 1) Explain and identify physical quantities along with their units and make measurements with accuracy by minimizing different types of errors.
- 2) Understand the scalar and vector quantities and use this knowledge in solving relevant real-life problems.
- 3) Describe the types of friction, its coefficients and methods to reduce or increase friction between different surfaces.
- 4) Analyze different types of motion, acting forces along the motion and conservation of momentum principle to describe rocket propulsion, recoil of gun etc.
- 5) Compare and relate physical properties associated with linear motion and rotational motion along with the application of conservation of angular momentum.
- 6) Understanding of relationships for work, energy and power and solve related problems.

Explain the principle of conservation of energy also identify various forms of energy, and energy transformations.

7) Describe the phenomenon related to properties of matter such as pressure, surface tension, stress, strain, elasticity, viscosity and their effect.

# Chemistry-I

1.1 Course Number: CY101

1.2 Contact Hours: 3-0-0 Credits:9

1.3 Semester-offered: 1<sup>st</sup> Year –Odd

1.4 Prerequisite: Class 10<sup>th</sup> level Chemistry and Mathematics

1.5 Syllabus Committee Members: Dr. Sabyasachi Pramanik & Dr. Souvik De

## 2. Objective:

- i) To impart the knowledge of fundamental principles of chemistry for future learning of engineering principles
- ii) To make students realize the importance of fundamental chemistry in engineering disciplines.

## 3. Course Content:

Unit-wise distribution of content and number of lectures

Unit	Topics	Sub-Topic	Lectures
1.	<b>Atomic Structure</b>	Atomic number, isotopes and isobars. Thompson's model and its limitations, Rutherford's model and its limitations, Bohr's model and its limitations Quantum number, Aufbau principle, Hund's rule, Pauli's exclusion principle, electronic configuration.	8
2.	<b>Periodic Properties of Elements</b>	Classification of Elements, Significance of classification, brief history of the development of periodic table, modern periodic law and the present form of periodic table, periodic trends in properties of elements -atomic radii, ionic radii, inert gas radii Ionization enthalpy, electron gain enthalpy, electronegativity, valency. Nomenclature of elements with atomic number greater than 100. Basic Concepts of s, p, d and f-block Elements	8
3.	<b>Chemical Bonding and Molecular Structure</b>	Orbit vs. Orbital, Valence electrons, ionic bond, covalent bond; Lewis structure, polar character of covalent bond, covalent character of ionic bond, resonance, geometry of covalent molecules, VSEPR theory, concept of hybridization, involving s, p and d orbitals and shapes of some simple molecules, Valence-Bond Theory.	8
4.	<b>Concept of Moles and Chemical Equation</b>	Phases, Mole concept and problems, Standard solution, normal solution and molar solution, concentration terms-normality, molarity, gm/l, ppm, normality equation, acid-base titration. Chemical equation-definition, qualitative and quantitative significance, limitations, balancing by partial and ion-electron method, electronic concept of oxidation and reduction, Stoichiometric calculations.	7
5.	<b>Acids-Bases and Salt</b>	Acids, bases and salts, Theories of acids and bases- Arrhenius, Bronsted-Lowry, Lewis theory, Strong acids and strong bases, Concept of pH and pKa, conjugate acid-base pair, classification of salts, hydrolysis of salts and its effect, Concept of Buffer, Indicator.	7
<b>Total</b>			<b>38</b>

## **4. Readings**

### **4.1 Textbooks:**

1. NCERT Textbook (Class XI and XII)
2. Engineering Chemistry, B. K. Sharma

### **4.2 References Books:**

1. A Textbook of Engineering Chemistry, Sashi Chawla
2. Engineering Chemistry, Jain and Jain
3. Applied Chemistry, Dr.Raman Rani Mittal

## **5. Outcomes of the Course:**

After completion of this course students will be able to

- 1) Know about the structure of an atom and write the electronic configurations of atoms.
- 2) Understand the variation of physical and chemical properties of elements such as ionization potential, electron affinity, electronegativity and learn about the periodic table.
- 3) Understand chemical bonding, concept of hybridization, as well as structure and shape of molecules.
- 4) Impart knowledge about various atomic and molecular quantities, strength and balancing chemical reaction.
- 5) Explore acid-base chemistry with a focus on the equilibrium aspects of these reactions.

## Engineering Mechanics

1.1 Course Number: ME101

1.2 Contact Hours: 2-1-0 Credits: 8

1.3 Semester-offered: 1<sup>st</sup> Year –Odd

1.4 Prerequisite: Class 10<sup>th</sup> level Physics & Mathematics

1.5 Syllabus Committee Members: Dr. Naveen Mani Tripathi, Dr. Sanat Kumar Singha, Dr. Abhimanyu Kar & Dr. Karthik Babu NB

### 2. Objective:

- i) To develop the ability to model and analysis of mechanical engineering systems using vectorial representation of forces and moments.
- ii) To be able to draw free-body diagrams of mechanical components and systems.
- iii) To develop the capacity to predict the effect of force and motion in the course of carrying out the design functions of engineering.
- iv) To understand the phenomenon of friction and the ability to solve problems related to the same. Ability to apply the principles of virtual work.

### 3. Course Content:

Unit-wise distribution of content and number of lectures

Unit	Topics	Sub-Topic	Lectures
1	<b>Basics and statics of particles</b>	Introduction – Units and Dimensions – Laws of Mechanics – Lami's theorem, Parallelogram and triangular Law of forces – Vector representation of forces –Vector operations of forces – additions, subtraction, dot product, cross product –Coplanar Forces – rectangular components – Equilibrium of a particle – Forces in space – Equilibrium of a particle in space – Equivalent systems of forces – Principle of transmissibility.	6
2	<b>Equilibrium of rigid bodies</b>	Free body diagram – Types of supports –Action and reaction forces – stable equilibrium – Moments and Couples – Moment of a force about a point and about an axis – Vectorial representation of moments and couples – Scalar components of a moment – Varignon's theorem – Single equivalent force - Equilibrium of Rigid bodies in two dimensions – Equilibrium of Rigid bodies in three dimensions	6

3	<b>Properties of surfaces and solids</b>	Centroids and centre of mass – Centroids of lines and areas - Rectangular, circular, triangular areas by integration – T section, I section, and Hollow section by using standard formula –Theorems of Pappus - Area moments of inertia of plane areas – Rectangular, circular, triangular areas by integration – T section, I section –Parallel axis theorem and perpendicular axis theorem – Principal moments of inertia of plane areas –Principal axes of inertia-Mass moment of inertia – mass moment of inertia for prismatic, cylindrical and spherical solids from first principle – Relation to area moments of inertia.	6
4	<b>Dynamics of particles</b>	Displacements, Velocity and acceleration, their relationship – Relative motion – Curvilinear motion - Newton’s laws of motion – Simple problems – Impact of elastic bodies.	5
5	<b>Friction and rigid body dynamics</b>	Friction force – Laws of sliding friction – equilibrium analysis of simple systems with sliding friction – wedge friction-. Rolling resistance -Translation and Rotation of Rigid Bodies – Velocity and acceleration – General Plane motion of simple rigid bodies such as cylinder and disc/wheel.	5
	<b>Total</b>		<b>28</b>

## 4. Readings

### 4.1 Textbooks:

1. Beer, F.P and Johnston Jr. E.R., “Vector Mechanics for Engineers (In SI Units): Statics and Dynamics”, 8th Edition, Tata McGraw-Hill Publishing company, New Delhi (2004).
2. Vela Murali, “Engineering Mechanics”, Oxford University Press (2010)

### 4.2 References Books:

1. Bhavikatti, S.S and Rajashekarappa, K.G., “Engineering Mechanics”, New Age International (P) Limited Publishers, 1998.
2. Hibbeler, R.C and Ashok Gupta, “Engineering Mechanics: Statics and Dynamics”, 11th Edition, Pearson Education 2010.
3. Irving H. Shames and Krishna Mohana Rao. G., “Engineering Mechanics – Statics and Dynamics”, 4th Edition, Pearson Education 2006.

4. Meriam J.L. and Kraige L.G., “ Engineering Mechanics- Statics - Volume 1, Dynamics- Volume

2”, Third Edition, John Wiley & Sons, 1993.

5. Rajasekaran S and Sankarasubramanian G., “Engineering Mechanics Statics and Dynamics”, 3rd

Edition, Vikas Publishing House Pvt. Ltd., 2005.

## **5. Outcome of the Course:**

On successful completion of this course, the student will be able to

- 1) Illustrate the vectorial and scalar representation of forces and moments
- 2) Analyse the rigid body in equilibrium
- 3) Evaluate the properties of surfaces and solids
- 4) Calculate dynamic forces exerted in rigid body
- 5) Determine the friction and the effects by the laws of friction

## Fundamentals of Computer Engineering

- 1.1 Course Number: CS101  
1.2 Contact Hours: 2-0-2 Credits:8  
1.3 Semester-offered: 1<sup>st</sup> Year –Odd  
1.4 Prerequisite: Basic knowledge of computers  
1.5 Syllabus Committee Members: Dr. Shikha Dwivedi

### 2. Objective:

The aim of the course is to help the students to attain the following basic competency through various teaching-learning experiences:

- i) Identifying and learning about various computer hardware and their uses.
- ii) Understanding of computer memory and its internal architecture.
- iii) Basic knowledge of software including different operating systems and its working.
- iv) Introduction to web designing using HTML coding.
- v) Developing awareness regarding cyber security.
- vi) Evolving logical thinking and problem-solving skills.
- vii) The course will assist diploma engineers in using fundamental ideas and principles to tackle complex engineering issues and comprehend various technology-based applications.

### 3. Course Content:

Unit-wise distribution of content and number of lectures

Unit	Topics	Sub-Topic	Lectures
1	<b>Computer Organization</b>	Introduction to generations of computer and its classification, Logical organization of computer (functional block diagram), Input & Output devices (keyboard, mouse, joystick, scanner, OCR, OMR, MICR, barcode reader, web camera, monitor, printer, plotter), Central processing unit.	5
2	<b>Memory &amp; Architecture</b>	Primary, secondary and auxiliary memory, Main memory unit, RAM, ROM, Cache memory, Registers, System bus, Hard disks & optical disks, CPU, SMPS, Motherboard, Ports and Interfaces, Expansion cards, Ribbon cables, Memory chips, Processors.	4

3	<b>Human Computer Interface</b>	Types of software (System and application), Operating system as user interface, Types of operating systems (Window, Linux, Mac), MS Office (Word, Excel, PowerPoint), Unix Shell and Commands, Programming languages, Compiler, Interpreter, VI editor, Computer viruses and its type, Detection and prevention of viruses.	5
4	<b>Computer Networks &amp; Web Design</b>	Internet, TCP/IP, World Wide Web, Browser, Internet address (Domain name, URL), Search engine.  Introduction to computer networks, Data communication and its components, Data transmission mode, LAN, MAN, WAN, Wireless LAN, Client/server network and peer-to-peer network, Intranet, Extranet.  Hyper Text Mark-up Language (HTML), Cascading Style Sheet (CSS), Creating web pages, Lists, Hyperlinks, Tables, Web forms, Inserting images, Frames, Hosting options and domain name registration.	10
5	<b>Information Security</b>	Protection, Security, Risk, Threat, Vulnerability, Exploit, Attack, Confidentiality, Integrity, Availability, Non-repudiation, Authentication, Authorization, Codes, Plain text, Encryption, Decryption.	3
	<b>Total</b>		<b>27</b>

### List of Experiments:

1. Introduction to various components of Computer system.
2. Study and Practice of handling Microsoft Windows – Folder related operations, My-Computer, Window explorer, Control Panel.
3. Introduction to Microsoft Office.
4. Creation and editing of Text files using MS Word.
5. Creation and operating of spreadsheet using MS Excel.
6. Creation and editing power-point slides using MS Power Point.
7. Introduction to Unix operating system (Ubuntu).
8. Study and practice of Open Office: OpenOffice Writer, OpenOffice Spreadsheet, OpenOffice Impress.
9. Study and practice of Basic Linux Commands.
10. Study and practice of Vim editor and its various commands in different modes.
11. Introduction to inter-networking protocols, world wide web, browsers and search engines.
12. Understanding of IP addresses, significance and uses of various domain names and URLs.

13. Create webpages and webforms including lists, hyperlinks, images, table etc. by using basic HTML program with HTML tag.
14. Modify the same webpages by using CSS codes.
15. Write the complete HTML coding using CSS for the following table:

## Gradesheet of Diploma Students

	Maths	Physics	Chemistry	Human Values	Communication Skills	Engineering Thermodynamics
<b>Tom</b>	47	39	25	33	43	36
<b>Jimi</b>	23	45	25	37	40	39
<b>Tus</b>	50	43	38	44	40	37
<b>Ross</b>	31	30	42	35	29	22
<b>Max</b>	34	35	38	44	49	43

16. Write the complete HTML coding using CSS for the following form :

Admission Form for Assam Energy Institute

First Name:  Last Name:

Password:

Select Gender: ☐ Male ☐ Female

Answer the following questions:

Why do you want to join Assam Energy Institute?

Which branch have you selected and why?

Submit Form

## 4. Readings:

### 4.1 References Books:

1. A. Goel, Computer Fundamentals, Pearson Education.
2. P. Aksoy, L. De Nardis, Introduction to Information Technology, Cengage Learning.
3. P. K. Sinha, P. Sinha, Fundamentals of Computers, BPB Publishers.
4. R. S. Salaria, Computer Fundamentals, Khanna Publishing House.
5. Ramesh Bangia, PC Software Made Easy – The PC Course Kit, Khanna Publishing House.
6. Andrew S. Tanenbaum, David J. Wetherall Computer Networks (5th Edition), PHI.

7. M. Merkow, J. Breithaupt, Information Security Principles and Practices, Pearson Education.
8. J. Minnick, Web Design with HTML5 and CSS3 (8th edition), Cengage Learning.

## **5. Outcomes of the Course:**

After undergoing this subject, the student will be able to:

- 1) Describe functional units of a computer, its various peripherals and their applications.
- 2) Identify computer hardware as well as software (in the lab).
- 3) List the features of Word, Excel, PowerPoint and also able to perform calculations on excel sheet and demonstrate the use of PowerPoint for seminar presentations.
- 4) Identify various operating system file management commands (create, copy, move, delete and rename folders and files).
- 5) Demonstrate installation of application software in windows as well as in Linux operating system.
- 6) Acknowledge various computer languages and also able to differentiate between compiler and interpreters.
- 7) State computer networks such as LAN, MAN and WAN together with the internet, intranet and extranet.
- 8) Design basic web pages using the HTML along with the CSS.
- 9) Aware regarding the issues related to cyber security.

## Engineering Workshop Practices Laboratory

1.1 Course Number: ME103L

1.2 Contact Hours: 0-0-3 Credits: 3

1.3 Semester-offered: 1<sup>st</sup> Year –Odd/Even

1.4 Prerequisite: Class 10<sup>th</sup> level Mathematics

1.5 Syllabus Committee Members: Dr. Naveen Mani Tripathi, Dr. Sanat Kumar Singha, Dr. Abhimanyu Kar & Dr. Karthik Babu NB

### 2. Objective:

- i) To get a hands-on basic training of various common manufacturing processes
- ii) To understand the feasibility of different manufacturing processes depending on the raw materials and the product.

### 3. Course Content:

Unit-wise distribution of content and number of lectures

Unit	Topics	Sub-Topic	Number of Sessions
1	Carpentry	Study of the joints in roofs, doors, windows and furniture, Hands-on-exercise: Woodwork, joints by sawing, planning and cutting	2
2	Fitting Shop	Introduction and practice of various fitting processes: Use of hand tools in fitting, preparing a male and female joint of M.S.	3
3	Welding Shop	Introduction and practice of various Welding processes: Electric Arc welding Practice and Gas welding, TIG, MIG, Gas Cutting and application. Joints such as a Lap joint, a T-joint or a Butt joint are to be prepared.	2
4	Machine Shop	Introduction and practice of various Machining processes: Plain and Stepped cylindrical turning, grooving, knurling and Thread-cutting of a job in lathe.	3
5	Sheet Metal Work	Basics of Sheet Metal Work, essential properties required for sheet metal (malleable and formable), Forming & Bending, Model making – Trays and funnels, Different type of joints.	2
	<b>Total</b>		<b>12</b>

### 4. Readings

#### 4.1 Textbooks:

1. Elements of Workshop Technology, Vol. I and II by Hajra Choudhary, Khanna Publishers

#### 4.2 Reference Books:

1. Workshop Technology by WAJ Chapman, Viva Books
2. Workshop Manual by Kannaiah / Narayana, Scitech

#### **5. Outcome of the Course:**

- 1) Practical knowledge of the several manufacturing processes
- 2) Skills developed in carpentry, fitting welding, machining and sheet metal work
- 3) Basic idea of how things are produced in the industry

## Chemistry Laboratory

1.1 Course Number: CY101L

1.2 Contact Hours: 0-0-2 Credits: 2

1.3 Semester-offered: 1<sup>st</sup> Year –Odd/Even

1.4 Prerequisite: Class 10<sup>th</sup> level Chemistry

1.5 Syllabus Committee Members: Dr. Sabyasachi Pramanik & Dr. Souvik De

### 2. Objective:

- i) To incorporate the habit of working in laboratory while maintaining discipline, safety and integrity.
- ii) To provide hands-on experience on the basic methods of quantitative analysis.

### 3. Course Content:

Sl. No.	List of Experiments
1	Introduction of a Chemistry Laboratory
2	Preparation of standard solution of oxalic acid or potassium permanganate.
3	Determination of strength of given sodium hydroxide solution by titrating against standard oxalic acid solution using phenolphthalein indicator
4	Standardization of $\text{KMnO}_4$ solution using primary standard oxalic acid solution.
5	Determination of Fe content in Mohr Salt using $\text{KMnO}_4$ solution
6	Estimation of total hardness of given water sample using standard EDTA solution
7	Determination of Alkalinity of given water sample using known concentration of an acid
8	Determination of pH of given water sample
9	Determination of the total dissolved solid of a given water sample
10	Determination of viscosity of a solution using Ostwald viscometer

#### **4. Outcome of the Course:**

- 1) To prepare solution of a given strength
- 2) To use basic laboratory techniques and equipment such as titration, pH meter, viscometer etc.
- 3) To estimate of strength of acid /base and ions present in domestic/industry water
- 4) To estimate iron content in metal and alloys
- 5) To determine the quality of domestic/industry water

## Universal Human Values

1.1 Course Number: HU101

1.2 Contact Hours: 1-1-0 Credits: 5

1.3 Semester-offered: 1<sup>st</sup> Year –Odd

1.4 Prerequisite: NA

1.5 Syllabus Committee Members: All Faculties of AEI

### 2. Objective:

- i) To help the student see the need for developing a holistic perspective of life.
- ii) To sensitize the student about the scope of life – individual, family (inter-personal relationship), society and nature/existence
- iii) To strengthen self-reflection
- iv) To develop more confidence and commitment to understand, learn and act accordingly.

### 3. Course Content:

Unit-wise distribution of content and number of lectures

Unit	Topics	Sub-Topic	Lectures
1	<b>Motivation and Objectives of Human Values Course</b>	Introduction to the objectives of the course. Content and process of the course including mode of conduct. Daily life as lab for the course. Activities in the course.	1
2	<b>Purpose of Education</b>	How human being has a need for Knowledge, what should be the content of knowledge, how the content should be discussed in education. Complimentarily of skills and values, how the current education system falls short.	2
3	<b>Peers Pressure, Social Pressure</b>	In various dimensions of life, how do these things work. What is the way out? In the context of education, peer pressure etc.	1
4	<b>Concept of Competition and Excellence</b>	How competition leads to degradation of self and relationships. How excellence is the basic need of a human being. What is excellence?	1
5	<b>Time Management</b>	How does one deal with myriads of activities in college? Focus of the mind.	1

6	<b>Concept of Preconditioning</b>	How preconditioning affects our thinking, behavior, work, relationships, society and nature. How do we develop pre-conditioning? What are the various sources of preconditioning? How do we evaluate our Preconditioning? How do we come out of it?	1
7	<b>Concept of Natural Acceptance in Human Being</b>	What is natural acceptance? How can the concept of natural acceptance be used to evaluate our preconditioning? Universal nature of natural acceptance. Are anger, jealousy, hatred natural? How do we feel when we experience them? Which feelings are natural for a human being and which are not?	2
8	<b>Understanding Relationships</b>	Are relationships important? What is the role of relationships in our life? If relationships are important then why they are important? If they are important then why it is the case that we are not discussing them? What are the notions/conditions and factors which stop us to explore more into relationships? Relationships in family and extended family. Dealing with anger, Basic expectations in relationships. Seven types of relations, Gratitude as a universal value in relationships, Nine universal values in human relationships, Trust as the founding value, Concept of acceptance, Unconditional acceptance in relationships, Our preconditioning affecting our relationships, Our relationships with subordinate staff, with people of opposite gender, caste, class, race, How relationships have the power to force a person to change his preconditioning.	2
9	<b>Concept of prosperity Material goods</b>	What role others have played in making material goods available to me: Identifying from one's own life.	1
10	<b>Idea of Society</b>	What is a society? What constitutes a society? What systems are needed for a society to work? What is the purpose of society and various systems which are working in it? How understanding of Human Nature is important in order to understand the purpose of Society and various social systems? And what happens when this understanding is lacking?	1
11	<b>Balance in nature</b>	Balance which already exists in nature, How human beings are disturbing the balance. Resource depletion and pollution, our own role in wastage of electricity,	1

		water and in use of plastics, Waste management, Issues like global warming, animal extinction	
	<b>Total</b>		<b>14</b>

#### 4. Readings

##### 4.1 Suggested Readings:

1. Human Values and Professional Ethics by R R Gaur, R Sangal, G P Bagaria, Excel Books, New Delhi, 2010
